Anne & Scope

JITED is a peer-reviewed journal, focuses on international economics, economic development, and more importantly, the interface between trade and development. The links between trade and development economics are critical at a time when both fluctuating commodity prices and trade liberalization and agreements can radically affect the economic well-being of countries.

JITED is designed to meet the needs of international and development economists, economic historians, applied economists and policy makers. The international experts who make up the journal’s Editorial Board encourage contributions from economic world-wide.

JITED owns:
• bibliographical and applied issues in international and development economics
• economic applications of trade and/or development issues based on sound theoretical, empirical and testing fundamental economic hypotheses
• models of structural change
• trade and development issues of economies in Eastern Europe, Asia and the Pacific area
• papers on specific topics
• reviews on important branches of the literature

Notes for Contributors
All submissions should be made online at the journal International Trade & Economic Development Manuscript Central site (link to http://mc.manuscriptcentral.com). New users must first create an account. Once a user is logged onto the site submissions should be made via the Author Centre.

Authors should prepare and upload two versions of their manuscript. One should be a complete text, while in the second all document information identifying the author should be removed from files to allow them to be sent anonymously to referees. When uploading files authors will have the ability to define the anonymous versions as ‘File not for review’. When submitting your manuscript, please upload all of your original source files.

Submissions to the editrix will be taken to indicate that it is a peer-reviewed, unpublished work not written for publication elsewhere. By submitting a manuscript, the authors agree that the journal has the exclusive right to reproduce and distribute the article the authors have given to the publishers, including reprint, reprographic reproductions, microfilm, or any reproductions of a similar nature, and translations.

1. The submission should include a cover page showing the author’s name, the department where the work was done, an address for correspondence, if different, telephone numbers, email address and any acknowledgements.

2. Submissions should be in English, typed in double spacing with wide margins, one side only of the paper, preferably of A4 size. The title, but not the author’s name, should appear on the first page of the manuscript. Furthermore, to assist objective, the author should avoid any reference to her or himself which would enable identification by referees.

3. Author’s names should be anonymized as possible. The difficulty and expense involved in making amendments at the page proof stage is considerable, so the authors should prepare their typescript carefully: any alteration to the original text is strongly discouraged. One aim is equal publication: this will be helped if authors follow the above instructions, and return their page proofs to the editor on the date requested.

4. In a condition of publication that author assigns copyright or license the publication rights in their articles, including abstracts, to Taylor & Francis. This enables us to ensure full copyright protection and to disseminate the article, and of course the Journal, to the widest possible readership in print and electronic formats as appropriate. Authors retain many rights under the Taylor & Francis modes policies, which can be found at www.tandfonline.com/authors. Authors are responsible for obtaining permission to reproduce material from other sources.

5. Corresponding authors will receive free online access to their article through the website (www.tandfonline.com) and a complimentary copy of the issue containing their article upon completion. All authors are encouraged to have their articles published online as Early View® when proofs are received or alternatively on our journal website. For any queries, please contact our reprints department at reprints@tandf.co.uk.
Name of Specialty: International Trade and Economics. Cultivation Objective: This major training meets the development needs of moral, intellectual, physical, and aesthetic. Students will have a basic knowledge of humanistic literacy and scientific spirit, a systematic grasp of modern economic analysis methods, and a thorough understanding of international trade rules, practices, and international business operation models. They will have strong English communication skills and good professional skills, and become high-quality, composite, and application-oriented talents who can engage in foreign trade. International economics is concerned with the effects upon economic activity from international differences in productive resources and consumer preferences and the international institutions that affect them. It seeks to explain the patterns and consequences of transactions and interactions between the inhabitants of different countries, including trade, investment and transaction. International Economics and Trade is a subject that studies the reasons of international trade, international trade policy, international trade practice, international investment and international trade and economic development. International economics and trade is one of the majors of economic and trade in economics. The international economy and trade is the exchange of goods and services between countries. International economics and
